StoneCrete

Wall Systems

Precast Sound Wall Solutions

StoneCrete's patented "male" wall panel and "female" wall panel come with column/post sections that are cast as one-piece and stacked to the desired height which improves product functionality and allows for accelerated installation. Our solid panel design provides structural strength and security that will last for decades.

StoneCrete walls are available in standard heights of 300mm – 1800mm (1ft – 6ft) with standard lengths of 4.8m between post columns. Our wall system may be engineered to be stacked in order to accommodate higher heights if desired.

Providing Innovation,

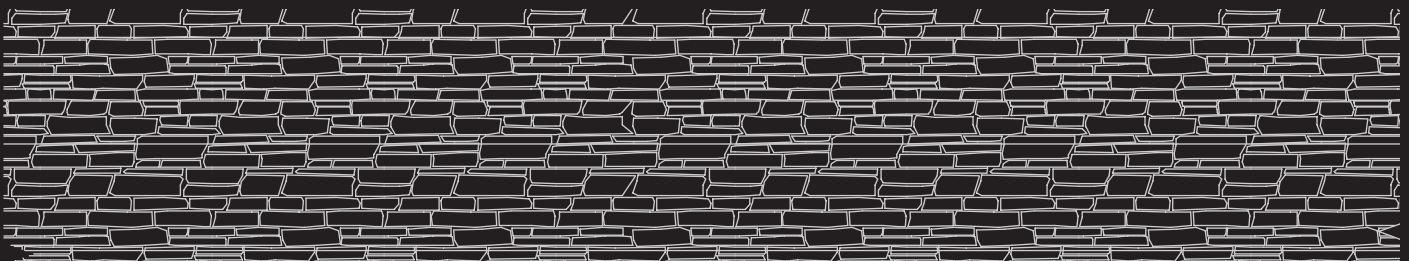

Proform Construction Products is an elite company with two Alberta based manufacturing plants providing innovative solutions to the precast concrete industry. The company's focus and commitment is to deliver the highest quality precast concrete products through quality workmanship, utilizing leading innovative technologies and providing superior customer service. Proform is an industry leader in designing and producing precast architectural wall panels, MSE retaining walls, gravity walls, noise barriers, decorative fencing, architectural precast, steps, stairwells and many other custom precast products.

Superior Durability, Consistent Quality

Proform Construction Products manufactures the proprietary StoneCrete wall system. These walls are designed for many different applications including security fencing, safety enclosures, perimeter fencing, privacy walls, noise barriers, sub-station enclosures, community entrance features and many other applications. StoneCrete walls are designed and manufactured utilizing precast concrete because of its superior durability and consistent quality. StoneCrete's proprietary system offers a robust, yet elegant wall system that will outperform traditional precast systems by providing a high quality and functional solution while reducing production and installation costs on site. Saving you time and money!

A Timeless Look of True Masonry

StoneCrete offers many different finishing designs to choose from. Whether it's a standard finish such as dry stack, ashlar stone, brick, allan-block or custom logos, StoneCrete has you covered. Texturing is formed on both sides of the wall which offers an aesthetically pleasing view from any angle. Our walls can be colored using a pigmented concrete sealer that will protect the integrity of the wall in addition to providing the subtle yet realistic look of actual masonry.

StoneCrete walls may be customized to suit a specific installation or security requirement. Decorative accents or attachments such as wrought iron, security cameras, and lighting can be provided and incorporated into the wall design for extra security or personalization
