

WINDOW WELLS

Precast concrete window wells are a great option on any home, for both new construction or renovation scenarios. These window wells come in a smooth or exposed finish and range in size from 4' to 8' in width. The Standard window well height is 3' with 6" and 12" extension available allowing flexibility for use on larger basement windows. Our Window Wells are an elegant option that allow for superior light filtering into the basement and comply with local egress Codes for the front or rear of the home.
